- During May global equity markets rose +2.2% (USD terms, +2.7% AUD) with significant strength in Europe (+4.8%), Korea (+8.1%) and Japan (+3.0%) whilst Emerging Markets (EM) ex Asia (-1.0%), China (+0.7%), India (+1.8%) and the U.S. (+1.3%) lagged.
- Global sector-wise Utilities (+5.4%), Telecommunication Services (+3.3%), Information Technology (+4.8%) and Consumer Staples (+4.6%) outperformed whilst Energy (-1.6%), Materials (+0.2%) and Financials (+0.0%) underperformed.
- Global factor-wise stocks with high Profitability/Growth & low Volatility characteristics (e.g. Bond Proxies & expensive Defensives) outperformed those with low multiples (e.g. Financials & Resources).
- Ongoing political controversies continue to cast doubt on U.S. President Donald Trump's ability to pass legislative reform. Against a backdrop of softer economic data, prospectively tighter monetary policy and easing long-term growth expectations (10Y Treasuries -8bp, DXY -2.1%), U.S. equities, particularly growth sensitive cyclicals, underperformed.
- French reformist Emmanuel Macron claimed 68% of the vote over far right candidate Marine Le Pen in the French presidential runoff, revitalising Franco-German relations and bolstering support for the E.U. Receding political risk premiums and a strengthening macroeconomic recovery propelled European equities and currencies higher (EUR +3.3%, NOK +1.7%, DKK +3.2%, SEK +2.1%).
- Following the impeachment of Korean President Park Geun-hye in March, reformer Moon Jae-in was elected president, rousing optimism for shareholder friendly chaebol reform. Across Asia, robust corporate earnings momentum and improving risk appetite buoyed equities more broadly.
- OPEC's agreement to extend (but not deepen) production cuts failed to offset continuing concerns around record high U.S. crude inventories and a resurgence in U.S. shale production. Oil declined -2.5%.
- Major contributors to performance included our European Recovery (e.g. **Telecom Italia**), Korean (e.g. **Hyundai Motor**), EM Consumer (e.g. **Jiangsu Yanghe Brewery**) and U.S. Natural Gas (e.g. **CONSOL Energy**) exposures whilst our Low-cost Oil (e.g. **Inpex**) and short exposures detracted.
